SONA STORE DATA ANALYSIS REPORT

Date: 27/07/2025

Excel for Data Analysis

Student Name: Pankaj Manoj Wagh

INTRODUCTION

This project presents a comprehensive analysis of Sona Store's retail data to understand its sales performance, customer behavior, and profitability. The aim is to generate actionable business insights using Excel tools such as pivot tables, charts, and conditional formatting. By analyzing trends in revenue, product categories, regional performance, and profit margins, this report supports better decision-making for business optimization.

INFORMATION ABOUT DATA SET

Order Date: Indicates when a customer placed the order.

Ship Date: Date on which the product was shipped.

Ship Mode: Method used for delivery — e.g., First Class, Same Day, Second Class, or Standard Class.

Product Name: Names of items sold.

Category & Sub-Category: Broad and detailed classification of products.

Sales, Profit, Quantity : Key financial and inventory performance indicators.

Region & State: Customer location data for region-wise performance analysis.

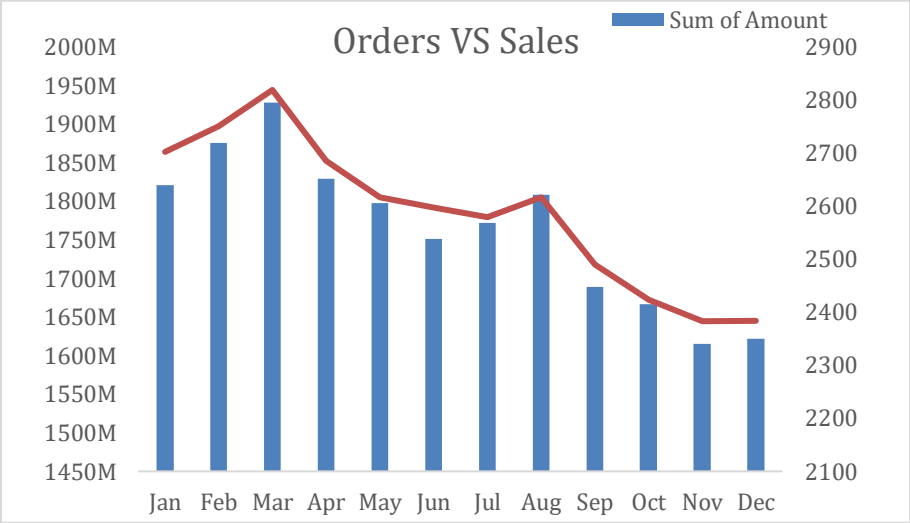
Customer Segment : Groups like Consumer, Corporate, or Home Office.

DATA PREPARATION

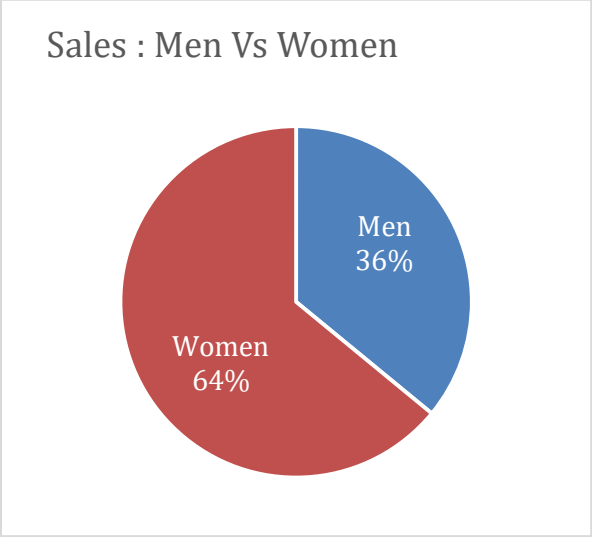
The dataset is cleaned and organized for analysis:
- Converted date fields (Order Date, Ship Date) into proper date formats.
- Removed unnecessary columns (e.g., Row ID, Postal Code).
- Missing values in columns like Person were filled with placeholder TBD.

PIVOT TABLE :

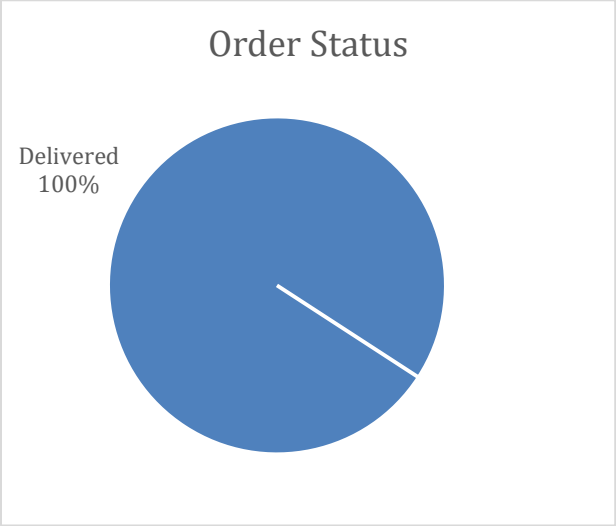
Orders Vs Sales :



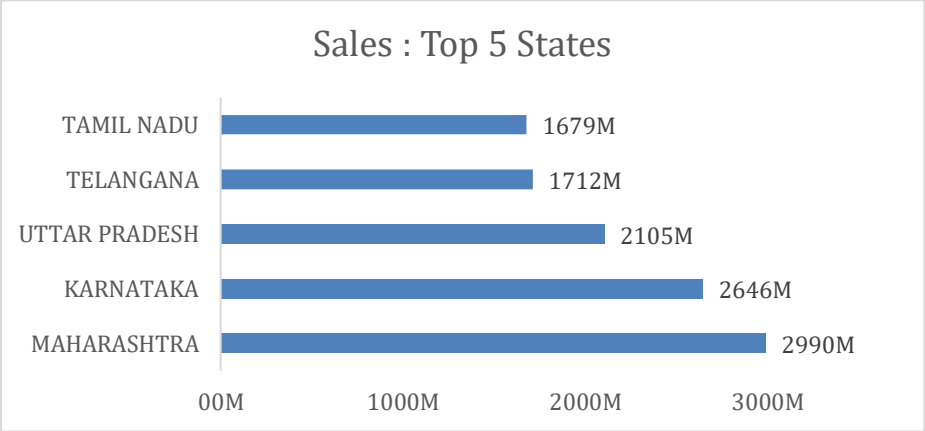
Sales : Men Vs Women :-



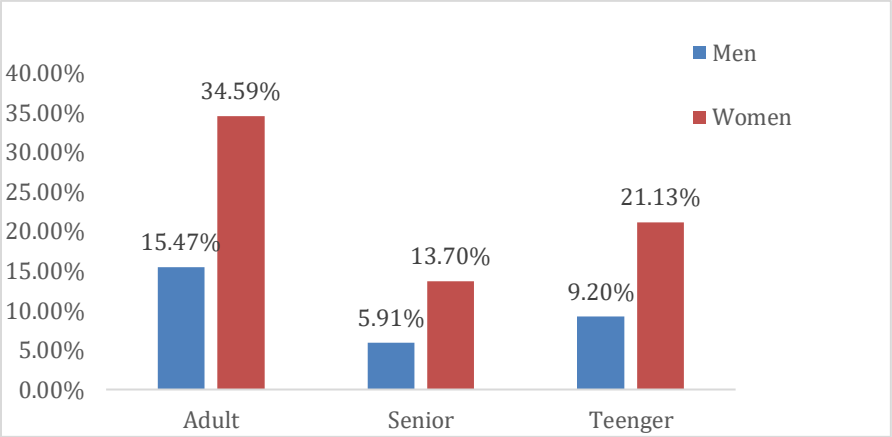
Orders Status : -



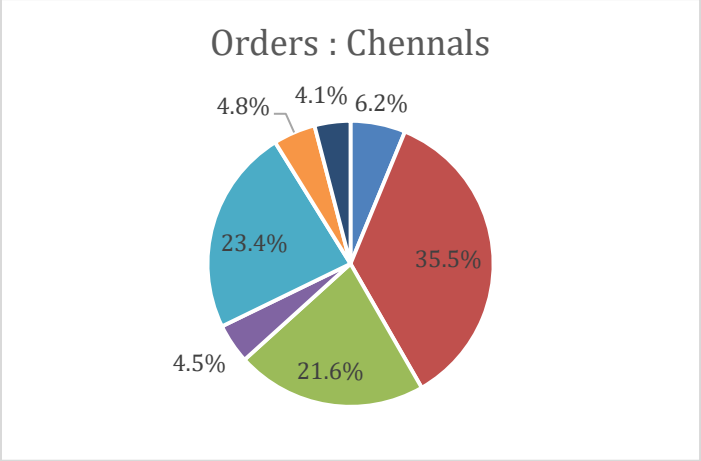
Sales Top 5 States :-



Age Wise :-



Ordres : - Chennals



DATA CLEANING STEPS

- Ensured numeric fields like Sales, Profit, Discount, and Shipping Cost were correctly formatted.
- Duplicates were checked and removed.
- Ensured consistent formatting in product names and categories.

QUICK INSIGHTS (Using Conditional Formatting, Filters, and Sort)

- Top-Selling Product: Kutra generated the highest revenue.
- Highest Profit Product: Ethnic dress maximum profit with minimal or no discount.
- Highest Shipping Cost Product: [Insert product name] had the highest delivery charge.

DETAILED INSIGHTS (via Pivot Tables)

CATEGORY-WISE PERFORMANCE:

REGION-WISE ANALYSIS:
- Top Region by Sales: Maharashtra.
- Lowest Performing Region: Uttar Prasdesh.
- Region-wise revenue shows potential for regional marketing strategies.

MONTHLY SALES TREND:
- Best sales months were : April.
- Seasonal trends can help in planning inventory and promotions.

ACTION STEPS

- Diversify Products: Relying too much on Technology products may increase risk during market slowdowns.
- Improve Profit Margins: Analyze high-cost low-profit products to improve margin.
- Boost Underperforming Regions: Target with offers and local ads.
- Optimize Shipping: Focus on reducing shipping costs for high-cost products.
